

STAT

PLANS AND PROGRAMS STAFF WEEKLY REPORT FOR  
PERIOD ENDING 22 NOVEMBER 1983

1. Progress Report on Tasks Assigned by the DCI/DDCI:

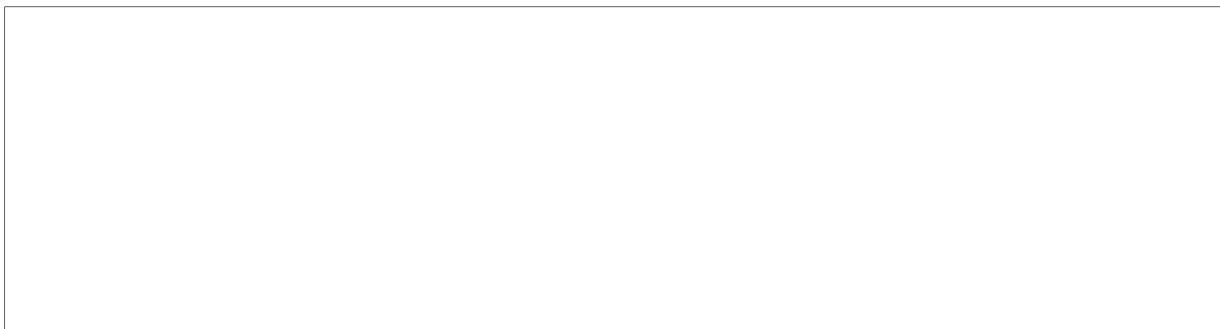

No tasks assigned during this reporting period.

2. Items or Events of Major Interest that have Occurred  
During the Preceding Week:

a. LIMS. The System Development Branch (SDB) of ODP, which is responsible for LIMS development, has, as a result of the recent ODP reorganization, been renamed and given expanded responsibilities. Now called the Logistics Systems Division (LSD), this activity will be responsible for all ODP support to the Office of Logistics. LSD (won't this lead to confusion?) personnel have been working with Booz-Allen and Hamilton to complete the LIMS Master Schedule and define the contents of the first Work Package. This Work Package will describe what aspects of LIMS will become operational with the Basic Operational Capability (BOC) in February 1985. It is anticipated that both of these documents will be delivered in early December and will be briefed to the LIMS Steering Committee in December or early January, 1984.

b. Data Administration Service (DAS). The Director of Logistics approved the formation of a new Logistics Career Panel that will serve personnel within the DAS function. It will be known as the MLD Panel and will be chaired by the Chief, P&PS (soon to be IMSS). The panel will be composed of four senior members from the DAS function, plus its chairman.

Systems Analysis Branch/P&PS/OL  
WEEKLY STATUS REPORT  
Week of 14 to 18 November 1983

I. Major Activities During the Past Week:

A. Support to OL:

STAT  
STAT

CONIF (Contract Information System). The extract from CONIF for the ICS payment data was not selecting all the correct data. This has been corrected by adding a new attribute, LD/IIN/ICSFLAG, to the LINE/DETAIL dictionary. OF/CONIF will add a similar attribute, IN/ICSFLAG, to its INVOICE dictionary, and it will bridge to the new LINE/DETAIL attribute. In addition, the ICSFLAGUPD procedure was written to update this attribute to the current date. This procedure will be executed on Mondays if input was done over the weekend. Also, if nightly interface processing should fail, it will need to be executed before the interface is run again the following night. (Washington) [redacted]

[redacted]

STAT

FARS (Federal Automated Requisitioning System). The SUSPENSE and SUSPMMSG files were compressed this week. This has reduced the back up time for these two files by half and the daily processing time has been reduced also. [redacted]

STAT

The NEWMSG program was updated to allow the RRI field to accept alphanumeric input. It was tested by the customer and is now in production. [redacted]

STAT

MISCELLANEOUS. The monthly Agency Wang Users Group meeting was held on 14 November 1983. The main focus of the meeting was a panel discussion on the backup procedures used by various offices. (Washington) [redacted]

II. General Items:

A. Support to OL:

STAT  
STAT

TRAINING. [redacted] attended the "Introduction to CIA" course at Headquarters on 14-18 November. [redacted]

III. Problems:

None to report.

IV. Upcoming Events:

None to report.
